Reliable Guest Wake Up

Using the room telephone, guests may set a single Wake up call or multiple Wake ups for the duration of their stay in the hotel. If linked to a PMS (Property Management System), MiDAS can use the respective Guest's home language to prompt the guest through the Wake up setting process. Wake up times are played back to the guest during this process to ensure mistakes have not been made which is possible on the traditional PABX type Wake up. MiDAS also supports up to 10 Wake up message languages. For the integrity of the Hotel a journal printer is provided which keeps a hard copy of the status of the Wake up calls and for the time when Wake up calls have been logged.

MiDAS Management Systems is a leading supplier of Telephone Management and Voice Messaging Systems to the Telecommunications industry. For further information please contact us at:
